AHMED MOHAMED ABDO

+201118115131 | ahmed@mohamed-abdo.me | github.com/a7mdabdoo | linkedin.com/in/ahmd-mhmd-abdo | Qena, Egypt

OBJECTIVE

Ambitious second-year FCAI student with a solid logical foundation in C++ and Object-Oriented Programming. Passionate about algorithmic problem-solving and currently focusing on Mobile Application Development using **Flutter**. Seeking to apply my academic knowledge, logical skills, and continuous learning to contribute to real-world software projects and grow as a professional developer.

EDUCATION

Faculty of Computers and Information, South Valley National University (Qena) Expected 2028
Second-Year Student

KEY PROJECTS

Al-Minshawi Quran App | Flutter, Dart
- Developed a cross-platform mobile application for listening to Quran recitations.
- Implemented state management and optimized audio playback for a seamless user experience.
- Successfully published and distributed the app on APKPure.
- **GitHub:** github.com/a7mdabdoo/minshawi-recitations-app

File-Based Database Manager | Dart
- Built a CLI tool executing full CRUD (Create, Read, Update, Delete) operations.
- Improved data handling efficiency and persistence using CSV files and JSON decoding.
- **GitHub:** github.com/A7Md3BD0/Database-By-dart

OOP Task Management System | Python
- Developed a CLI task manager using Object-Oriented Programming (OOP) concepts.
- Automated deadline tracking and task organization utilizing the `datetime` module.
- **GitHub:** github.com/A7Md3BD0/Task-Management

O Visual Shark Tank | Python & Streamlit
- Developed an interactive data visualization dashboard for investment analytics as the final project for the **Ministry of Youth's Code Camp** initiative.
- Utilized **Pandas** for data processing and **Streamlit** to transform raw datasets into actionable visual insights.
- **GitHub:** github.com/A7Md3BD0/Visual-Shark-Tank

LinkedIn UI Clone (Team Project) | HTML, CSS, JS, Bootstrap
- Collaborated in a team environment to build a fully responsive front-end LinkedIn clone.
- Delivered as the final graduation project for the Creativa Web Track.
- **GitHub:** github.com/A7Md3BD0/final-project

Twitter Interface Clone | HTML, CSS
- Independently designed a static front-end Twitter clone to solidify foundational web design principles.
- **GitHub:** github.com/A7Md3BD0/clone-Twitter

Alfjr Academy | WordPress & Graphic Design
- Developed a fully functional educational platform using WordPress.
- Designed customized promotional graphics to enhance user engagement.
- **Website:** alfjracademy.com

SKILLS

- **Programming Languages:** C++, Python, Dart, JavaScript.
- **Mobile Development:** Flutter, Dart.
- **Web Development:** HTML, CSS, Bootstrap, React.js.
- **Tools & Technologies:** Git, GitHub, WordPress, Adobe Photoshop, Illustrator, CapCut.
- **Core Competencies:** Problem Solving, Algorithms, OOP.

EXPERIENCE & TRAINING

- **One Million Egyptian Coders (Ministry of Youth & Sports):** Programming & AI Instructor — Mentoring youth in coding fundamentals, algorithms, and AI concepts in collaboration with Misr El-Kheir and Mawaheb Foundations.
- **Creativa:** Basic Programming (C++), Web Design, React.js, and Flutter.
- **Innovation Club:** Python Programming Basics.
- **Egyptian Olympiad in Informatics (EOI):** C++ and Problem Solving.
